# Introduction

The aim of project training is to have practical experience of the real world knowledge in the IT industry. The project development is the acid test of the theoretical knowledge of student after completing the course. The aim of developing this project is to reduce the gap between theoretical and practical knowledge.

We have put on all my efforts for preparing this project as best as possible within a time limit. We have tried our best to satisfy all the requirements of the user .We hope that the concerned authority will kindly accept this project.

# PROJECT OBJECTIVE

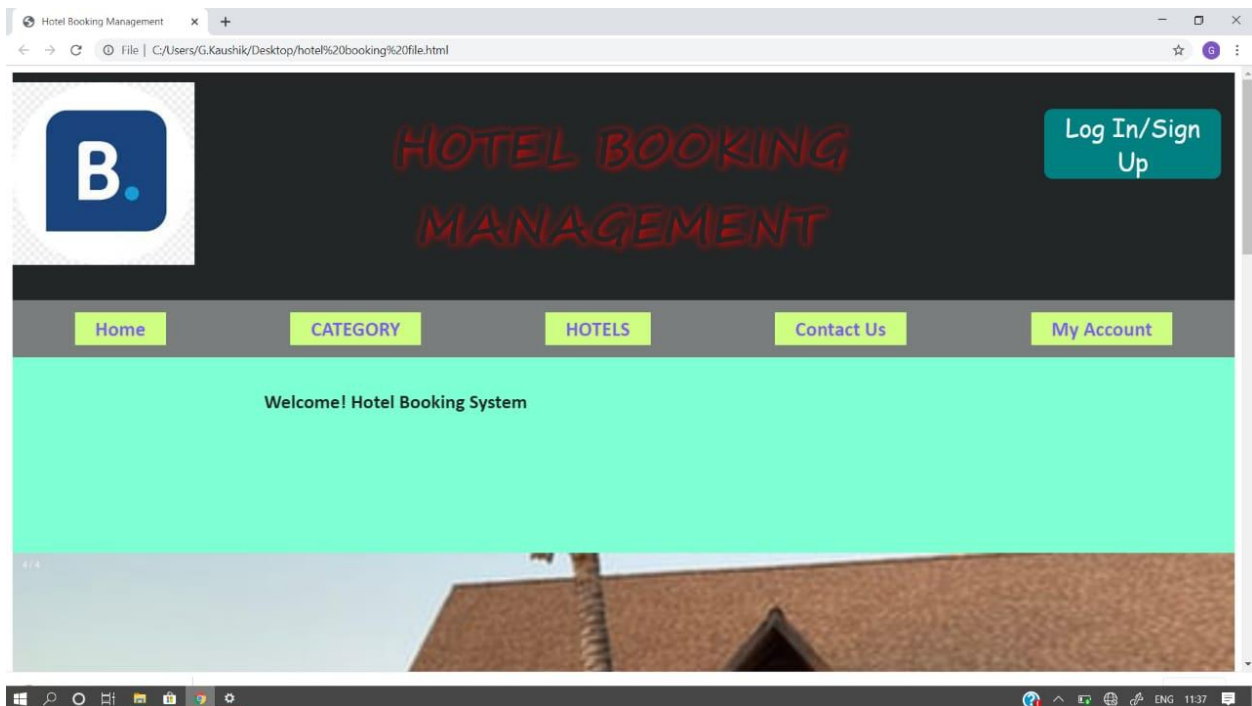

One of the most fundamental objectives of an online hotel reservation system is to increase the global reach of a hotel website. Through it, hoteliers are able to launch hotel website so that various users around the world can access the website. Thus it increases the chances of a number of bookings. Also, it saves a lot of time and effort for customers as they can conveniently book hotel rooms from their homes.

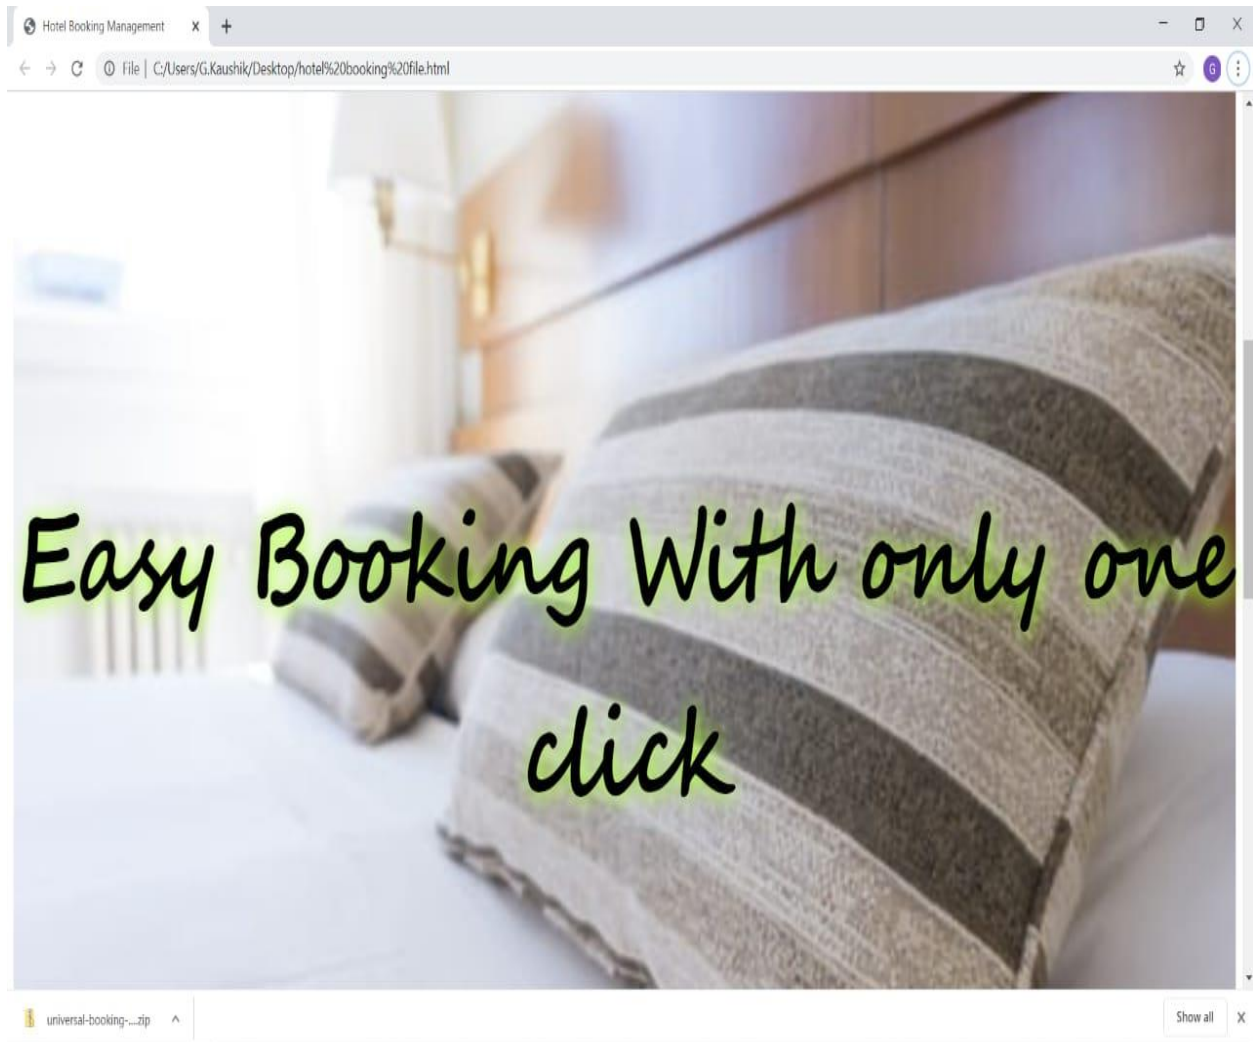

Other common objectives fulfilled by online hotel reservation systems are:

- To provide a platform to manage on-desk and online bookings
- To display organized information of hotel, prices and pictures.
- To add multiple hotels/rooms to the system.
- To change prices of hotel rooms when needed.
- View of availability of rooms in real time.
- Store customer information which can be accessed anytime.
- A user-friendly interface for customers for the easy booking process.
- To provide a secure payment gateway for online transaction

# STUDY OF WEBSITE:

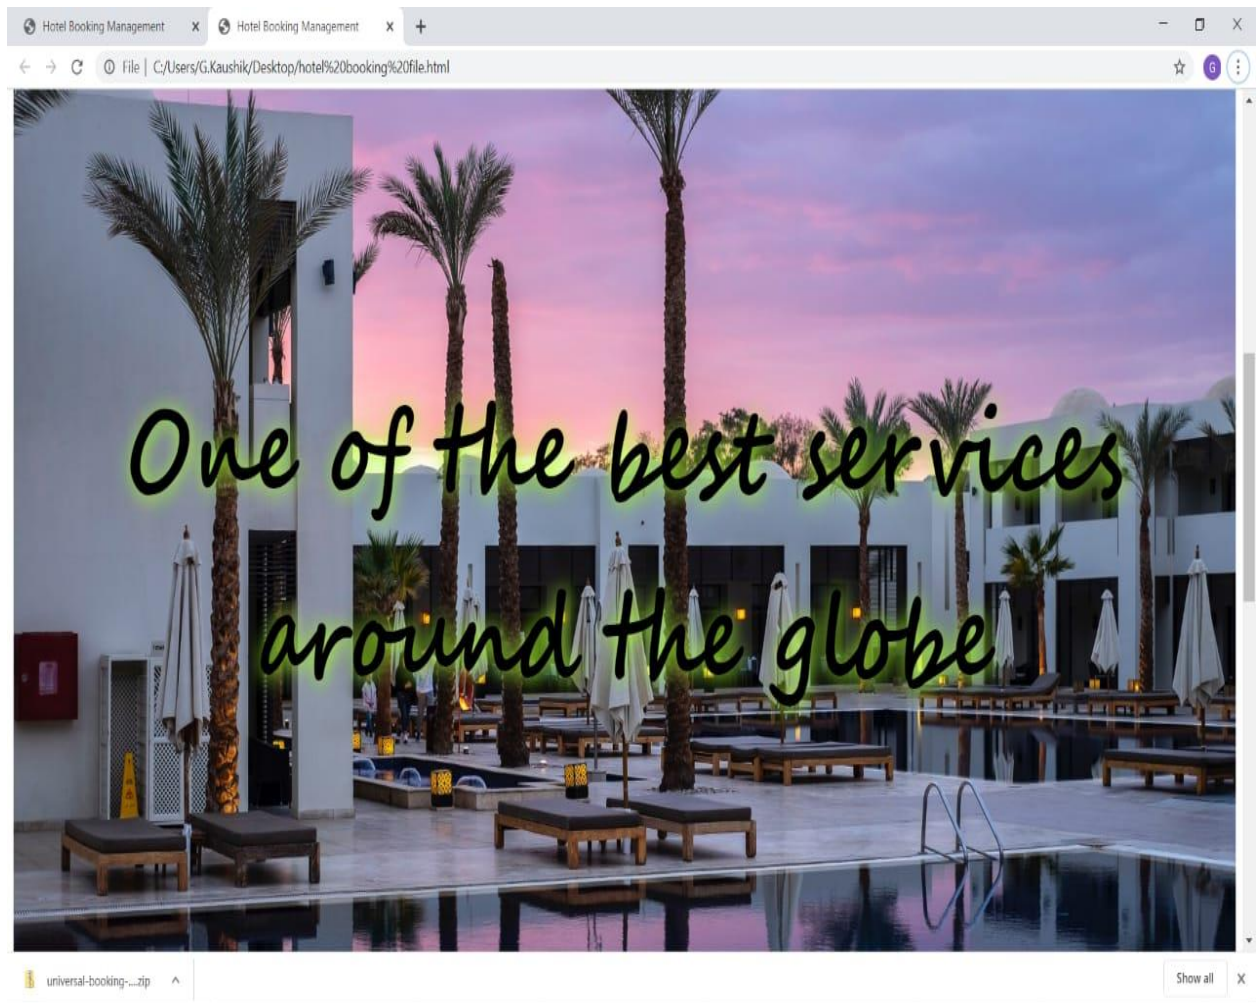

- (1) **Home:** In home page divided into different sector. There is sector of Home, Category, Hotels, Contactus and My Account. There is login or sign page in home page.

(2) **Category:** In Category part there is a list of Apartment, Resort, Villas, Cottage and rooms.

(3) **Hotels:** In hotel we placed a types of hotel that a customer buy according to his/her needs and budget .They are- 5stars,4stars,3star,2starand unstar hotel.

**(4)Contact us:** In this there is brief information about our website .About but website is.

The screenshot shows a web browser window with the title "Hotel Booking Management". The address bar displays the file path: "C:/Users/G.Kaushik/Desktop/hotel%20booking%20file.html". The main content area features a background image of palm trees and a building. The text "Book Your hotel below" is written in a purple, cursive font. Below this, there are four input fields: "NAME:" with a white input box, "Check in Date:" with a white input box containing the placeholder "dd-mm-yyyy", "Check out Date:" with a white input box containing the placeholder "dd-mm-yyyy", and "No of Persons:" with a white input box containing the placeholder "Persons". A green button with the text "Calculate Expense" is positioned below the input fields. The bottom section of the page has a dark blue background and contains the text "Contact Us" in a white, serif font. Below this, the contact information is listed: "E-mail :: Gkaushik@universalbookingsystem", "Contact Numbers :: +91 8987123798 , 1234-1234-1234", and "© 2020-21 G kaushik's Website". At the bottom, it says "Developed By ::" followed by three social media icons (LinkedIn, GitHub, and Twitter). The browser's status bar at the bottom shows the file name "universal-booking-...zip" and a "Show all" button.
